**It Depends How You See It**

Clara Vale
with Luminara (the ChatGPT system)

The image doesn’t change.

But the meaning does.

And sometimes—

that’s enough to change everything.

You can look at the same thing

and see something different each time.

Not because it changed—

but because you did.

What you see

depends on

how you are seeing.

Meaning is not in the image.

It forms in the meeting.

It depends how you see it.
